DETAILED ACTION

Claim Rejections - 35 USC § 101

1. Claims 1-42 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter. According to the disclosure (and not specifically claimed), the method claims 1-21 are directed towards a method for determining the goodness metric of a carousel. The claim language does not arrive at a tangible result and are simply steps taken for working through an algorithm. The steps merely manipulate abstract ideas or solve a purely mathematical problem and therefore have no limitation to a practical application. Furthermore, the article of manufacture claims 22-42 directed towards a "machine accessible medium" for determining the goodness metric of a carousel (according to the disclosure, not specifically claimed) do not arrive at a tangible result and are simply steps taken for working through an algorithm on a "machine accessible medium". This "machine accessible medium" could be as broad as a scanner, for interpreting a printed medium that provides instructions for fulfilling the algorithmic steps (as claimed). Also, this "machine accessible medium" for performing the same steps as the method claim 1, merely manipulates abstract ideas or solves a purely mathematical problem and therefore has no limitation to a practical application.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
